

Sirs,

Please do not eliminate the no-call list!!! It is so nice to be able to eat a meal with the family without having to answer the phone and then having to hang up on them because they are so persistent. They will even call you right back and let it ring and ring. This should never happen in the privacy of your own home. My husband had a guy selling windows call back 5 times because my husband kept hanging up on the guy. We were ready to have our phone taken out!!! Now, since Attorney General Steve Carter got the no-call list, we have privacy and a little peace at home. Thanks, Steve Carter, for all you have done.
